SESSIONS

OPENING SESSION:

Extremism in America — Emerging Trends in Domestic Terrorism

Dr. Mark Pitcavage, National Director of Fact Finding, Anti-Defamation League

KEYNOTE:

Ten Commandments of Fighting Terrorism

Dr. Sabi Shabtai, Terrorism Expert and Author

PANEL DISCUSSION:

Optimizing Joint Law Enforcement Operations

The need for information sharing and coordinated efforts among law enforcement agencies is critical in the fight against domestic terrorism. This session will critically analyze best practices of joint efforts as well as shortcomings of shared jurisdictional work through illuminating case studies.

WORKSHOPS

You will have the opportunity to attend 4 out of 5 following sessions. We will do our best to assign you to your first four choices.

WORKSHOP A: Debriefing and Recruiting the Extremist Examine the psychological and ideological dimensions of terrorism and consider the profile of the extremist, including the motivations and driving force that leads to action. This session will analyze pathological terrorism as well as interviewing techniques to get inside the mind of the extremist.

WORKSHOP B: Information Technology in the Fight against Terrorism Analyze extremist use of the internet as a primary means of communication, including carrying their message to domestic and international audiences, recruiting next generation supporters, raising funds and engaging in tactics of intimidation and harassment. In this new environment how can law enforcement exploit this same technology to protect national security and counter domestic terrorism?

WORKSHOP C: The Rise of the Left-Wing and Single Issues Groups Violence, radicalism and aggressiveness are becoming increasingly characteristic of left wing and single issues groups. This session will analyze the ideology and tactics employed by these groups whose actions have caused death, injury and tremendous property damage.

WORKSHOP D: Different DNA — Indicators, Red Flags and Information Gathering in Extremist/Terrorist Investigations Ideological influences, history and activity patterns are critical components in intelligence gathering and threat assessments. This session will focus on various tools used in investigations, resources for information, intelligence networks, as well as visuals (i.e.: symbols and tattoos) that can aid in the recognition process.

WORKSHOP E: The Main Event — Maintaining Order at Extremist Rallies, Marches, and Protests How are extremist-related public rallies and marches different from those of more mainstream groups? What additional problems must law enforcement face in maintaining public order? How do officers deal with protesters and counter-protesters? What intelligence gathering opportunities are there at extremist events?
